

I ask you to reject NAB's Petition 04-160. In my job I travel across the country and use satellite Radio. I enjoy the freedom of listening to the music I enjoy regardless of where I am. I also rely on the radio for information on weather and traffic . I cannot keep up on which station I should listen to locally. With satellite radio I am free to make the choice. I believe the deregulation of the media was about freedom? I am able to receive a diversity of stations and music I cant receive any other way. Diversity is also a goal of the FCC isnt it? I believe the larger problems on the airwaves now need your attention. Such as was recently highlighted at the Super bowl. Trying to help the NAB stifle competition isnt the goal of the FCC is it? I pay for this service and cannot see why it would be limited.
